### Description

This class is for anglers who are looking to learn how to fish for walleye or have dabbled a little in the past. The class is designed for anglers with limited or no experience targeting walleye. The focus of this class will be on trolling and bottom bouncing for walleyes but will touch on other presentations as well. After taking this class, you will have the knowledge to purchase the correct gear or adapt gear you already own. You will know the basics on how to find the best locations to maximize your success. You will also learn about the habits and migration of walleye on Lake Erie. Lastly, you will leave with online resources to help prep for your next fishing trip. This class will also be a great way to meet and network with other anglers.
